The Committee on Bulldings and Real
Estate, to whom was referred the proposition of Clator and Salisbury, in relation
to moulding on cornice and other extra
work on Union township school house,
reported in favor of paying \$25 for lookouts. In the matter of extras for putting by a disinterested architect, that the plan of Mr. Yost (the architect) shows moulding on the same, then the said contractors should only be paid the difference between the cost of the latter and the former size.

Mr. Bickel moved that the matter be recognized to the Committee on Building.

The circumstances are as follows: The boy was employed in the packing-room, through which runs a shaft connecting by means of belts and pulley with the maposed route of the Wheeling and Toledo chinery above. This shaft is about two feet from the floor, and perhaps four inches in diameter. The lad, while carrying kegs across the room, attempted to step over this shatt. A CONCATENATION OF ATTRACTIONS .-A singular avertisement appears in our columns this morning. Fifty black cats are wanted at the Register office before 3 P. M. today. The gentleman who handed in th of the public will be excited. The first thought is that of course the cats are in some way connected with the lecture to be delivered this evening by the eminent editor of the Register. But how? reported in favor of paying \$25 for lookouts. In the matter of extras for putting
on moulding, which item amounts to

\$245 88, the committee had not arrived
at any definite conclusion. The architect
contends that the plan on which the contract was awarded shows a three and four
inch moulding, which Messrs. Clator &
Salisbury do not admit to be the case,
claiming asix inch moulding. The Committee think that if it can be determined
by a disinterested architect that the plan
is needed to teach each its part. The

more than one professor could manage

Then again, it may be olny a sharp stroke of business-a ten strike in the sausage business, or in the fur trade, or both; or a contract to provision a gang o Chinese laborers in Texas: or a rat-catch ing contract at Chicago.

Whatever the design may be, we are satisfied it is a grand and original one, and that every boy who is the fortunate pos-sessor of a black cat may consider his fortune made, to the number of fifty-and who knows but that, like Mr. Boutwell's bond purchases, the number may be in creased.

We are very sure Washington Hall will be crowded this evening to witness the novelty of fifty black cats introduced into ne lecture, for no one can doubt that in ome way that is the programme; and that with the entertaining treatment of this subject, or these subjects, by the distinguished lecturer, Wheeling has the promise of a rare treat.

NEWS .- We have heard that com plaints are made of the scarcity of local news in the papers at present. Do our eaders expect us to manufacture news When there is nothing of interest transpires in the city we cannot make items.

THE WEED SEWING MACHINE.—From the Scientific American.—I have used one of the new Weed Machines for about six months in my family, and its work is all that any reasonable man could expect. In addition to the satisfaction it gives my wife and daughter, I will add my own opinion, as a practical mechanic, that, for perfection of workmanship in its build, and easy of manipulation, as well as simplicity of construction and readiness of adjustment, it is not excelled by any other Sewing Machine in the market. I am personally acquainted with the builders of THE WEED SEWING MACHINE .- From personally acquainted with the builders of the Weed Sewing Machine. Probably no the Weed Sewing Machine.
